

Wanted Queries Test Plan

- *2 high level (broad) tests*
 - *Entry should be output if all fields are valid*
 - *Entry should be cleared if the clear button is clicked or be modified when the modify button is clicked*
- *2 low level (specific) tests*
 - *On the enter form page, input fields should highlight blue if the input is empty*
 - *On the enter form page, the input fields should highlight red if conditions are not met*
- *1 smoke/sanity test (basic run through of the whole site)*
 - *An entry into “enter wanted” should be made with all forms correctly input. Then, the entry should be able to be modified or deleted using the appropriate actions*
